1. Qualitative Information on Consolidated Results for the Current Period

(1) Qualitative information on consolidated operating results

During the three month period ended March 20, 2015, the Japanese economy continued its moderate recovery trend centered in the corporate sector, as both the employment and income environments are improving as a result of the decline in crude oil prices as well as the positive effects of the government's economic policies. In the beauty industry, demographics are having a growing impact on salons, such as the decline in customers due to the decrease in the productive-age population (15 to 64 years old) and difficulty hiring staff because of the drop in the number of beauty school students. Despite this environment, the yearly usage amount by mature women, centered on women in their 40s, is on the rise, and the high employment rate has resulted in a recent rising trend in usage amounts by women in their mid-20s as well.

Amid this environment, the Milbon Group believes that it is important that professionals with expertise respond to the awakening and heightening beauty needs of these two generations of women—those in their 20s and those in their 40s. Efforts are focused on salons with the goal of “raising the level of expertise of professionals and supporting higher productivity in order to respond to women, who continue to shine in society, from those awakening to beauty to those with heightened beauty needs.”

Consolidated net sales during the three month period ended March 20, 2015 increased to 6,083 million yen (up 4.9% year-on-year). This was primarily due to steady growth in sales of the system hair care brand Aujua, as well as solid sales of hair care products containing Milbon's original hair repair ingredient CMADK. Favorable sales growth of the overseas subsidiaries thanks to the proactive educational activities conducted in the salons was another factor for the increase.

Operating income was 997 million yen (up 5.7% year-on-year), ordinary income was 980 million yen (up 15.3% year-on-year) and net income was 635 million yen (up 26.9% year-on-year).

Breakdown of net sales by product category and breakdown of net sales into domestic and overseas sales are shown below:

(2) Qualitative information on consolidated financial position

Total assets at the end of the three month period ended March 20, 2015 increased by 196 million yen compared to the end of the previous fiscal year to 28,335 million yen.

Current assets decreased by 726 million yen compared to the end of the previous fiscal year to 13,581 million yen. This was mainly due to the 881 million yen decline in cash and deposits and the 359 million yen decline in notes and accounts receivable - trade, as well as the 396 million yen increase in merchandise and finished goods.

Non-current assets increased by 922 million yen compared to the end of the previous fiscal year to 14,754 million yen. This was due mainly to the 412 million yen increase in land in conjunction with the purchase of land adjacent to the Yumegaoka Plant and an increase of 231 million yen in investment securities attributable to factors such as higher prices of listed stocks.

Current liabilities decreased by 155 million yen compared to the end of the previous fiscal year to 3,714 million yen. This was due mainly to decreases in accounts payable - other and in income taxes payable of 308 million yen and 380 million yen, respectively, and increases in accounts payable - trade and in provision for bonuses by 259 million yen and 241 million yen, respectively.

There were no significant changes in non-current liabilities from the end of the previous fiscal year.

Net assets increased by 336 million yen compared to the end of the previous fiscal year to 24,440 million yen. This was due mainly to the 152 million yen increase in foreign currency translation adjustment due to the weakening of the yen and the 149 million yen increase in valuation difference on available-for-sale securities attributable to factors such as higher prices of listed stocks.

As a result, the equity ratio changed from 85.7% at the end of the previous fiscal year to 86.3%. Net assets per share based on the total outstanding shares as of the end of the period under review increased from 1,472.10 yen per share at the end of the previous fiscal year to 1,492.68 yen per share.

(3) Qualitative information on consolidated operating forecasts

In terms of the full-year forecast there are no changes to the previous consolidated performance forecasts, which were announced on January 21, 2015.

(3) Changes in accounting policies, changes in accounting estimates and retrospective restatements

(Changes in accounting policies)

(Application of the Accounting Standard for Retirement Benefits, etc.)

Regarding the “Accounting Standard for Retirement Benefits” (ASBJ Statement No. 26, May 17, 2012) and “Guidance on Accounting Standard for Retirement Benefits” (ASBJ Guidance No. 25, May 17, 2012), effective from the current first quarter, the Company has applied the provisions of the main clauses of Paragraph 35 of the Accounting Standard for Retirement Benefits and Paragraph 67 of Guidance on Accounting Standard for Retirement Benefits, reviewed its calculation method for retirement benefit obligations and current service costs, and changed its method of attributing expected benefits to periods from the straight-line basis to the benefit formula basis. In addition, the Company has changed the method for determining the discount rate from a method based on a period approximate to the expected average remaining working lives of employees to a method that uses a single weighted average discount rate reflecting the estimated timing and amount of benefit payments.

Application of the Accounting Standard for Retirement Benefits and Guidance on Accounting Standard for Retirement Benefits is in line with the transitional measures provided in Paragraph 37 of the Accounting Standard for Retirement Benefits, and the effect of the revision to the calculation method for retirement benefit obligations and current service costs has been added to or deducted from retained earnings as of December 21, 2014.

As a result, as of December 21, 2014, net defined benefit asset decreased by 55,973 thousand yen and retained earnings decreased by 36,103 thousand yen. The effect of the revision on operating income, ordinary income and income before income taxes and minority interests for the three month period ended March 20, 2015 is immaterial.
